

Digital Transformation of Workforce Development

From paper to electronic workflows

Himss[®]

NORTH CAROLINA *Chapter*

Five Key Components to any Project

- Clearly and specifically defined need
- C-Level staff buy-in
- Research and selection of the right tool
- Bulldog driven approach
- Analysis of progress and process at every stage

The Need

- Is the need actually a need?
- Is the need clearly defined?
- Is the need specific?

The Buy-in

- Whom do you need to convince?
- Who will this affect?
- Is the result worth the pain?

Adoption of the project result will hinge on how well you educate the why of the project to those it will affect.

The Choice

- Has due diligence been served?
- Are you sure???
- How do you know?

The Bulldog

- Forward Driven
- No-Quit Attitude
- Recognizes Limits

The Process

- How's it going?
- Is the ticking loud enough?
- Any course corrections?

The Result

- Project Completion
- Forward Progress
- Confidence

The Aftermath

- Was it a success?
- Why was it successful?
- What would you do differently?

The Q & A

- What have you seen?
- What would you also do?
- Words of caution?
